FOR YOUTH INVESTMENT

Adaptation of Roger Hart's Ladder of Participation

**Rung 8 – PWLE initiated shared decisions with Systems:** PWLE-led activities, in which decision making is shared between PWLE and systems as equal partners.

**Rung 7 – PWLE initiated and directed:** PWLE-led activities with little input from systems.

**Rung 6 – System initiated shared decisions with PWLE:** System-led activities, in which decision making is shared with PWLE.

**Rung 3 – Tokenism:** System-led activities, in which PWLE may be consulted with minimal opportunities for feedback

**Rung 2 – Decoration:** System-led activities, in which PWLE understand purpose, but have no input in how they are planned.

## **Building Blocks of Systems Change**

#### Understanding the System

Develop an understanding and analyze the various components, relationships and factors that contribute to the issues and fragmentation before initiating change.

2

#### Identifying Leverage Points

Identify what part of the systems you are trying to change that can have the most significant impact and where you can effectively operationalize strategies & leverage resources. 3

#### Collaborative Approach

Develop relationships/ partnerships where multiple stakeholders work together to identify common goals, build consensus and bring diverse perspectives (including past and current recipients of services) and resources to the table.

4

#### **Neutral Convener**

Engagement of a trusted intermediary as a catalyst to facilitate dialoque and operate as an ally in implementing change. An intermediary brings together the full spectrum of stakeholders and provides them with a range of resources.

5

#### Building Capacity

Training, technical assistance and customized support that meets people where they are, creating space and muscle for reflection and adaptation.

6

#### Communication and Advocacy

Advocate for changes in policies, influence and educate decision-makers and create an environment conducive to change. This involves cultivating leaders and advocates to champion change.

7

#### Quality Assurance and Measurement

Track and measure
the impact of
system change
efforts by building
evidence with
research and data.
This entails
collecting data,
assessing
outcomes, and
adjusting
strategies based
on feedback and
results.
